SRM PUBLIC SCHOOL • CLASS 10 BOARD REVISION-1

Day 5 Night Assessment — Evaluated Result Sheet

Student: **Pranav Jothi (Grade X)** • Date: **1 Nov 2026** • Submitted: **5 Pages (Written Test)**

22.0 / 30
73.3% • First Class (Verified & Locked)

📊 Subject-Wise Performance Breakdown

Verified by Mama & AI Evaluator

Subject & Topics	Max Marks	Achieved	Percentage	Status
🧪 **Science:** Ch 4 Carbon & Compounds (Covalent, Tetravalency, Soaps & Micelles, Chemical Eqns)	15.0	**14.5**	**96.7%**	🌟 Outstanding
📖 **English:** Madam Rides the Bus (Prose) + CBSE Class 10 Grammar (Concord, Tenses, Editing, Speech)	15.0	**7.5**	**50.0%**	⚠️ Grammar Focus
Total Cumulative Score	**30.0**	**22.0**	**73.3%**	✅ Solid Overall

🧪 Science: Detailed Question Review (14.5 / 15.0)

Exceptional Board Level

Q1. Covalent Bonding Reason, Catenation & Tetravalency (5 Marks) — 4.5 / 5.0 M

Pranav's Answer: Correctly stated carbon has valency 4, needs to gain or lose 4 e^- for octet. Stated losing or gaining is impossible due to high energy and small atomic size, so it shares electrons. Accurately defined Catenation (self-linking into chains and rings) and Tetravalency (bonding with H, N, O, Cl).

✓ Precision Note: 0.5M deducted only for omitting explicit mention that C^{4-} nucleus with 6 protons cannot hold 10 electrons, and C^{4+} requires huge energy to remove 4 electrons leaving 6 protons holding 2 electrons. Conceptually 100% sound.

Q2. Cleansing Action of Soap & Labeled Micelle Diagram (5 Marks) — 5.0 / 5.0 M (Full Marks)

Pranav's Answer: Clear differentiation of two ends: hydrophobic hydrocarbon tail (attracted to grease/dirt) and hydrophilic ionic head (attracted to water). Described spherical micelle formation and suspension in water upon agitation.

✓ Diagram: Very neat, correctly labeled micelle diagram showing central grease particle surrounded radially by hydrocarbon tails and outer ionic heads. Full 5/5 marks awarded!

Q3. Three Organic Chemical Equations (5 Marks) — 5.0 / 5.0 M (Full Marks)

Pranav's Answer:

(i) Esterification: $CH_3COOH + C_2H_5OH \xrightarrow{(Conc.\ H_2SO_4)} CH_3COOC_2H_5 + H_2O$ (Ethanoic acid + Ethanol → Ethyl ethanoate + Water). Perfect catalyst & names.

(ii) Saponification: $CH_3COOC_2H_5 + NaOH \rightarrow CH_3COONa + C_2H_5OH$. Accurately written.

(iii) Oxidation: $CH_3CH_2OH + 2[O] \xrightarrow{(Alk.\ KMnO_4\ /\ Acid.\ K_2Cr_2O_7)} CH_3COOH + H_2O$. Correct oxidising agents and balanced products.

✓ 100% accurate chemical formulas, conditions, and balancing.

📖 English: Detailed Question Review & Grammar Action (7.5 / 15.0)

Literature Strong (6/8) • Grammar Needs Drill (1.5/7)

Q4. Valli's Bus Journey Plan & Deepest Desire (4 Marks) — 3.0 / 4.0 M

Pranav's Answer: Remembered textbook facts: fare was 30 paise one-way, trip took 45 minutes each way, and destination was the nearby town.

Improvement: Mention her overwhelming desire ("to ride the bus just once") and planning around mother's afternoon nap (1:00 PM to 4:00 PM) to get full 4/4 marks.

Q5. Comparison of Elderly Woman vs Valli on the Bus (4 Marks) — 3.0 / 4.0 M

Pranav's Answer: Captured NCERT sensory details: woman chewing betel nut with juice threatening to spill, large earlobe holes with ugly earrings, and poking invasive questions at Valli.

Improvement: Check minor spelling ("earring", "repulsive/disgusted") and highlight Valli's proud dignity as a self-respecting passenger.

Q6. CBSE Class 10 Grammar Practice (7 Marks) — 1.5 / 7.0 M

- **(i) Neither of the two boys...** Pranav wrote: *were* ❌ → **Correct: was** (Rule: 'Neither of' takes a singular verb). [0/1 M]
- **(ii) Bread and butter...** Pranav wrote: *are* ❌ → **Correct: is** (Rule: Singular dish/pair concept takes 'is'). [0/1 M]
- **(iii) If it rains tomorrow, we...** Pranav wrote: **we will cancel** ✅ → Correct conditional! [1.0/1 M]
- **(iv) Error Correction: "Every students in our school participates..."** Pranav changed 'participates' → 'participate' ❌ → **Correct: Error = students, Correction = student** (Rule: 'Every' is always followed by a singular countable noun). [0/2 M]

• **(v) Reported Speech: Teacher said to Pranav, "Did you complete the homework today?"** Pranav wrote: *Teacher asks pranav that did he has completed his homework today* ❌ → **Correct: Teacher asked Pranav if he had completed his homework that day.** [0.5/2 M]

💡 Mama's Final Feedback & Encouragement for Pranav:

1. Brilliant Science Achievement: Scoring 14.5 / 15 (96.7%) in Chemistry proves that Pranav has thoroughly understood Chapter 4. Chemical formulas and micelle diagrams are at a 100% board-ready standard.
2. Commendable Effort & Honesty: Pranav rightly pointed out that Analytical Paragraph was not in today's portion, showing how closely he tracks his syllabus. He completed the alternative Grammar test with great focus.
3. Next Priority: Grammar rules (Concord, Reported Speech, Determiners) are easy marks once memorized. A 15-minute quick revision of these 4 rules will turn this 73% into 95%+ tomorrow! Keep up the great spirit, Pranav!
